1.0 PURPOSE

The purpose of this procedure is to

- 1.1 Describe the organization of the Emergency Plan Implementing procedures.
- 1.2 Describe the relationship of the Emergency Plan Implementing Procedures to other plant procedures.
- 1.3 Describe a method for making use of the Emergency Plan Implementing Procedures in the event of an emergency.

2.0 SCOPE

The organizational guidance contained in this procedure applies to Unit One and Unit Two procedures that would involve response indicated in the ANO Emergency Plan.

3.0 REFERENCES

3.1 References Used in Procedure Preparation:

- 3.1.1 Arkansas Nuclear One Emergency Plan

3.2 References Used in Conjunction with this Procedure:

- 3.2.1 1000.08, "Regulatory Reporting and Communication"
- 3.2.2 1000.21, "Public Communications"
- 3.2.3 1202 Series Procedures - Emergency Operating Procedures (Unit 1)
- 3.2.4 1203 Series Procedures - Abnormal Operating Procedures (Unit 1)
- 3.2.5 1602 Series Procedures - Radiation Protection Procedures
- 3.2.6 1043 Series Procedures - Security Administration Procedures
- 3.2.7 1903 Series Procedures - Emergency Plan Implementing Procedures
- 3.2.8 1904 Series Procedures - Offsite Dose Projection Procedures
- 3.2.9 2202 Series Procedures - Emergency Operating Procedures (Unit 2)
- 3.2.10 2203 Series Procedures - Abnormal Operating Procedures (Unit 2)
- 3.2.11 1063 Series Procedures - Training Administration Procedures

3.3 Related ANO Procedures:

- 3.3.1 Arkansas Nuclear One Fire Plan
- 3.3.2 Arkansas Nuclear One Industrial Security Plan

6.2 Relationship of the Emergency Plan Implementing Procedures to Other Plant Procedures

- 6.2.1 Activation of the Emergency Plan does not supersede the use of other plant procedures. Rather, the Emergency Plan Implementing Procedures are intended to supplement normal plant procedures and do not supersede other plant procedures unless they specifically state so.
- 6.2.2 Operations personnel actions to recognize and recover from unusual or emergency conditions are contained in Emergency Operating Procedures, 1200 and 2200 series procedures. The 1903.1X procedures contain the guidance for classifying unusual or emergency conditions into Emergency Action Levels for purposes of the emergency organization response.
- 6.2.3 Requirements for radiological monitoring and personnel exposure limits are contained in the Technical Analysis Procedures, 1600 and 2600 Series Procedures. However, in the event of an emergency, allowable exposure limits may be increased above the normal radiation exposure limits in accordance with the requirements contained in procedure 1903.33, "Re-entry Guidelines".
- 6.2.4 The participation of the security force in the overall emergency response is described in the Emergency Plan Implementing Procedures. However, sensitive details of the response of the security force to an emergency are contained in the Security Plan Implementing Procedures (1043 Series Procedures).
- 6.2.5 Communications with the media in the event of an emergency shall be in accordance with procedure 1000.21, "Public Communications".
- 6.2.6 Preparation and review of written reports to the Nuclear Regulatory Commission to close out an emergency shall be in accordance with Procedure 1000.08, "Regulatory Reporting and Communication".
- 6.2.7 Training of Arkansas Nuclear One personnel on their emergency-related responsibilities and drills and exercises to maintain emergency readiness shall be in accordance with the 1063 Series Procedures.
- 6.2.8 The plant response to a fire shall be in accordance in Procedure 1903.22, "Fire or Explosion".

6.3 Use of the Emergency Plan Implementing Procedures

- 6.3.1 Each Duty Emergency Coordinator, when on duty, shall maintain a binder which contains copies of appropriate Emergency Plan Implementing Procedures and other appropriate emergency related plant procedures.
- 6.3.2 Next to each significant step in the Emergency Plan Implementing Procedures a line is placed in the right hand margin to allow the user to insert his initials and the approximate time the step is taken, as appropriate. By taking this action, the user may identify which steps have been taken and which steps remain to be taken, and he also generates a record of key actions taken. If appropriate, the user should also write notes on the procedure, or on a separate piece of paper kept with the procedure, to document his actions.
- 6.3.3 The Duty Emergency Coordinator and the Shift Operations Supervisor shall maintain logs of the incident.
- 6.3.4 At the end of the incident, appropriate forms, logs, marked up procedures and notes should be provided to Duty Emergency Coordinator or Recovery Manager.
- 6.3.5 Appropriate forms, logs, marked-up procedures, notes should be turned over to the Emergency Planning Coordinator for filing.
- 6.3.6 The Emergency Planning Coordinators shall ensure that a written summary of the event is submitted to the Nuclear Regulatory Commission and the Arkansas Department of Health.
