Reference: Vogtle Electric Generating Plant - Units 1 and 2  
50-424, 50-425; Pullman Power Products, Quality of  
Welds and Radiographs

Attention: Mr. James P. O'Reilly

Gentlemen:

On January 25, 1983, Mr. C. W. Hayes, the Vogtle Project Quality Assurance Manager, reported a potential deficiency to the NRC concerning the above referenced subject.

At this time, Georgia Power Company is still conducting its investigation into this subject. Due to differences in interpreting radiographic film, this concern will not be easily resolved. At this time, Georgia Power Company expects to submit an interim report to the NRC on May 27, 1983.

This response contains no proprietary information and may be placed in the NRC Public Document Room upon receipt.

Yours truly,

J. O. Foster

CWH/DOF/tlp
