Subject: Limerick Generating Station, Units 1 and 2  
Technical Specifications Change Request No. 93-23-0  
Incorrect Transmittal Letter Date Reference

Gentlemen:

This letter is being submitted to notify the NRC that the date identified on the letter transmitting Limerick Generating Station (LGS), Units 1 and 2, Technical Specifications (TS) Change Request No. 93-23-0, was incorrect. On August 12, 1994, PECO Energy Company submitted TS Change Request 93-23-0 requesting an amendment to the LGS, Units 1 and 2, TS to revise the Limiting Condition for Operation (LCO) for the Emergency Core Cooling System (ECCS) specified in TS Section 3.5.1, and associated Bases Section 3/4.5.1 and 3/4.5.2, to include a new ACTION statement in the event that the High Pressure Coolant Injection (HPCI) system, and one (1) Core Spray (CS) subsystem, and/or one (1) Low Pressure Coolant Injection (LPCI) subsystem, are inoperable. Although the letter was submitted on August 12, 1994, the date on the letter was incorrectly stated as August 12, 1993. Therefore, we are providing this letter to correct this inadvertent error, and apologize for any inconvenience this may have caused.

If you have any questions or require additional information, please do not hesitate to contact us.

Very truly yours,

G. A. Hunger, Jr.  
Director - Licensing
