50-400/401

March 10, 1983

50-400

Ms. Deborah Greenblatt
1634 Crest Road
Raleigh, North Carolina 27606

Dear Ms. Greenblatt:

Enclosed are the resumes on the Managing Consultants and the Project Engineers to be employed in analyzing and assessing the Physical Security Plan of the Sharon Harris Nuclear Plant.

Each Project Engineer will concentrate on a specialty. All Engineers are extensively cross-trained in more than two of the specialties depicted, except aviation, and will provide a fully integrated analysis team.

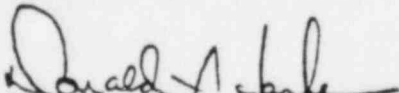

Ernest Tabata
Charles Crockett
James Blair
William Brady
Bobby Tuggle

Demolitions/Weapons
Operations & Intelligence
Anti/Counter Terrorism
Police Operations & Aviation
Communications

I am also enclosing a resume on Mr. Marvin Wells. Mr. Wells will be an alternate. He is well qualified in all areas listed above except Police Operations and Aviation.

A pre-deposition briefing will be held at Safeguards International, Inc. on or about Wednesday, April 14th. You are invited to send a member of your choosing, preferably a legal expert, to this briefing.

Sincerely,

Donald A. Henke
President

PROFESSIONAL BRIEF:

In 1975, Mr. Crockett was selected to form the nucleus of the Special Projects Section for the John F. Kennedy Center for Military Assistance (USAJFKCENMA) at Fort Bragg, North Carolina. In this capacity, he worked directly for the Commander, USAJFKCENMA, and provided Special Forces expertise to numerous agencies throughout the Federal Government.

Mr. Crockett provided expertise in the following areas:

1. Site Assessment
2. Security Procedures
3. Black-Hat (Adversary) Operations
4. Demolitions

He developed and presented a training program for security personnel assigned at the Seneca Army Depot.

He is well versed in Adversary Operations and Physical Security Program development.

Mr. Crockett has retired from the United States Army Special Forces with over twenty years of service, including over four years of combat duty in Southeast Asia.

EXPERIENCE:

Management Group, Inc., Albuquerque, N. M.

Assistant Project Manager:

Sandia Contract 49-4741, Tactical Procedures For The Physical Protection of Nuclear Fuel-Cycle Facilities. Project objective involved the preparation of a detailed study which became a published document and included various adversary scenarios, tactical responses, and recommendations for defeating the threat. Each scenario was demonstrated using computer system (BATL).

United States Army

Served in positions of increased responsibility both in hostile and non-hostile environments. Controlled an organization of 300 personnel while serving in the Republic of Vietnam.

Special Projects:

Directly responsible for providing personnel and participating in a large variety of highly sensitive projects for governmental agencies on a recurring basis. These projects were performed by highly qualified experts for the following agencies: Department of Energy (DOE); Sandia Laboratories; Nuclear Regulatory Commission (NRC); Defense Nuclear Agency (DNA); Army Armament Research and Development Command (ARADCOM); Defense Communications Agency (DCA); Department of Defense (DOD); Harry Diamond Laboratory (HDL); Army Mobility Equipment Research and Development Command (MERADCOM); United States Air Force (BISS); CINCLANT.

Special Forces Operations Sergeant:

Supervised personnel responsible for performing real world unconventional warfare operations.

Operations Sergeant (Blue Light):

Assisted in the organization, development, planning, training and equipping of the first counter-terrorist force for the United States Army. This involved personnel selection, training facilities construction and exercise deployment.

Mr. Wells Eddleman
1634 Crest Road
Raleigh, NC 27606

Mr. Eddleman,

Pursuant to our last conversation, the following data is submitted for your files.

The additional consultant that you inquired about will be Mr. James D. MacKie. Mr. MacKie is a retired military professional with over 20 years experience in Defense Industrial Security. The areas of his expertise that you will be concerned with are: security personnel selection and training, physical security systems, anti-terrorist operations, weapons training and qualifications, communications and security administrative procedures. Mr. MacKie is currently serving as a consultant to the Security Manager, Analytics Corporation, McLean, Virginia.

My personal training is outlined by 12 years of military experience involving: nuclear weapon facility physical security (all aspects), transit security for nuclear weapons and active nuclear materials, weapon training and qualifications, communications, terrorist - counter terrorist operations, bomb disposal team leader, and the design and implementation of administrative procedures for daily security operations. Since leaving the military, I have functioned in my current position with SSI Corp, and have served as a security consultant to several major companies. I also manage the security systems division of the firm. This division is responsible for the design and implementation of sophisticated electronic security/fire systems for the business community.

The original consultant fee schedule will be increased by \$200.00 per day plus expenses for Mr. MacKie's participation. I hope this material is helpful.

John R. Maples
Vice President
Operations and Training
