Attention: Mr. G. F. Wunder

Gentlemen:

Subject: VIRGIL C. SUMMER NUCLEAR STATION
DOCKET NO. 50/395
OPERATING LICENSE NO. NPF-12
MEETING TO DISCUSS INSTRUMENTATION CALIBRATION
MONITORING PROGRAM

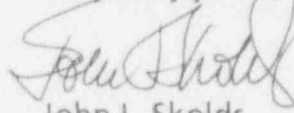

South Carolina Electric & Gas Company hereby requests a meeting with the Nuclear Regulatory Commission on September 29, 1994 to discuss implementation of Instrumentation Calibration Monitoring Program (ICMP) for the Virgil C. Summer Nuclear Station. This meeting was previously discussed with Mr. George Wunder and tentative agreement was made for the September 29, 1994, date.

A number of utilities are interested in the discussions for implementation of this program as part of the Technical Specification basis for instrumentation calibration frequency determination.

It is further requested that the appropriate NRC personnel be in attendance from areas related to technical specifications, instrumentation and controls, and engineering analysis.

The purpose of this meeting is to determine the approach which will be necessary to pursue a license amendment request which takes advantage of the benefits of the ICMP. Your support for this effort is appreciated. If there are further questions or if you need additional information, please contact Mr. Mike Fowlkes at 803-345-4210.

Very truly yours,

John L. Skolds
