March 23, 1983

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Denton:

ULNRC-614

DOCKET NUMBER 50-483
CALLAWAY PLANT, UNIT 1
TECHNICAL SPECIFICATION - SECTION 6.0

Reference: ULNRC-564 dated June 29, 1982

The referenced letter transmitted the Callaway Plant, Unit 1 Technical Specifications for NRC review. In a meeting with NRC on February 3, 1983, we agreed to submit a revised Section 6.0 of the Technical Specifications along with justification for changes from the standard specifications (NUREG-0452). Transmitted herewith are five copies of this information. We are also sending two copies of this information directly to Mr. G. Edison and one copy directly to Mr. F. Anderson.

We would appreciate an expeditious review of this section. The majority of our procedural and programmatic work being accomplished at this time is greatly impacted by the status of Section 6.0. At the February 3 meeting it was not clear who would be reviewing Section 6.0 for NRC. Please inform us when this determination is made.

Very truly yours,

Donald F. Schnell
