EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

0 2 While in Mode 1 at 0230, Reactor Coolant Cold Leg Temperature (Tc) was determined

0 3 to be outside the limits of LCO 3.2.6 and the associated Action Statement

0 4 was invoked. As required by this Action Statement, Tc was restored to within the

0 5 allowable limits. There was no impact on plant operations or the health and safety

0 6 of plant personnel or the public.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

10 This event was caused by failure of Operations personnel to properly monitor and control

11 Tc. Tc was restored to within limits at 0330. Operations personnel have reviewed the

12 event and have been directed to closely monitor essential plant parameters. This will

13 be included in their monthly retraining session. Corrective measures to prevent recurrence in

14 the form of plant design changes (i.e., high and low limit alarms with either manual or automatic permissive) are being studied and results of this will be submitted at a future

7 8 9 date.

date.
