Division of Licensing

Subject: James A. FitzPatrick Nuclear Power Plant  
Docket No. 50-333  
Modification of ADS Logic  
NUREG-0737 II.K.3.18

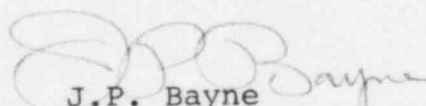

Reference: 1. BWR Owners' Group Report on NUREG-0737  
Item II.K.3.18 "Modification of ADS Logic",  
transmitted by letter from T.J. Dente to  
D.G. Eisenhut, dated October 28, 1982  
(BWROG-8260).

Dear Sir:

The Power Authority has reviewed the referenced study and confirmed its applicability to the FitzPatrick plant. This study concludes that: the current ADS initiation logic, with implementation of the BWR Emergency Procedure Guidelines, meets the intent of NUREG-0737 Item II.K.3.18; and, is adequate for all design basis events which require reactor vessel depressurization to maintain adequate core cooling. The necessary Emergency Procedure Guidelines have been incorporated into the emergency procedures for the FitzPatrick plant. The Authority, therefore, formally endorses this report.

The Power Authority considers NUREG-0737 Item II.K.3.18 complete for the FitzPatrick plant. Should you have any questions, please contact Mr. J.A. Gray, Jr. of my staff.

Very truly yours,

  
J.P. Bayne  
Executive Vice President
