**Subject: Beaver Valley Power Station, Unit No. 1 and No. 2**  
**BV-1 Docket No. 50-334, License No. DPR-66**  
**BV-2 Docket No. 50-412, License No. NPF-73**  
**IST (Inservice Test) Programs; Proposed Revision 1F and 2D**

The purpose of this submittal is to request NRC review and approval of Proposed Revision 1F (Enclosure 1) and 2D (Enclosure 2) to the Unit No. 1 and 2 IST Programs. The proposed revisions include requests for relief from code testing requirements and from including ASME code class, manufacturer supplied, skid-mounted pumps and valves in the IST Programs.

This request is a denouement of our response to Violation 50-412/94-09-01 for not including ASME code class skid-mounted pumps and valves in the Unit No. 2 IST Program. The proposed revision to the Unit No. 1 IST Program is being submitted for consistency, although not required, since Unit No. 1 is not an ASME code class plant for pumps and valves.

It is requested that the NRC complete the review of this proposed request by December 31, 1994, so that the implementing procedures can be revised concurrently with other commitments resulting from our response to Violation 50-412/94-09-01.

If you have any questions, please contact Mr. Nelson R. Tonet at (412) 393-5210.
