PRAIRIE ISLAND NUCLEAR GENERATING PLANT
Docket Nos. 50-282 License Nos. DPR-42
50-306 DPR-60

License Amendment Request Dated August 30, 1994

Line-Item Technical Specification Improvements to Reduce
Surveillance Requirements for Testing During Power Operation

Attached is a request for change to the Technical Specifications, Appendix A of the Operating Licenses, for the Prairie Island Nuclear Generating Plant. This request is submitted in accordance with the provisions of 10 CFR Part 50, Section 50.90. The requested amendment will implement six line item improvements recommended by Generic Letter 93-05, "Line-Item Technical Specification Improvements to Reduce Surveillance Requirements for Testing During Power Operation". Also the requested amendment will revise testing and calibration requirements associated with the containment hydrogen recombiners.

Exhibit A contains a description of the proposed changes, the reasons for requesting the changes, and the supporting safety evaluation/significant hazards determination. Exhibit B contains current Prairie Island Operating License and Technical Specification pages marked up to show the proposed changes. Exhibit C contains the revised Operating License and Technical Specification pages.

Please consider this License Amendment Request as a Cost Beneficial Licensing Action (CBLA) item in that these amendments may reduce NSP costs by more than \$100,000 over the life of the plant and deal with changes which improve plant safety or have low safety significance.
