Washington, DC 20555

SUBJECT: Revision to Commitment Due Date for the Training of Peach Bottom Atomic Power Station Units 2 and 3 Licensed Operator Personnel and Plant Staff on Technical Specification 3.0.D

REFERENCE: Letter from D. M. Smith (PECo) to The Director, Office of Enforcement, dated August 15, 1990; Peach Bottom Atomic Power Station, Units 2 and 3 Response to a Notice of Violation and Remittance of Civil Penalty - NRC Inspection Report Nos. 50-277/90-200; 50-278/90-200 and 50-277/90-06; 50-278/90-06

Dear Sir,

In the referenced letter, Philadelphia Electric Company (PECo) committed to formally train Peach Bottom licensed operator personnel and plant staff on Technical Specification 3.0.D using the involved incident and other industry events to reinforce Technical Specification compliance and operability determinations. It was intended that this training would be incorporated into licensed operator continuing training by December 1, 1990.

Upon further review, it was determined that procedural guidance for Technical Specification 3.0.D would be more beneficial than training alone. Therefore, the above training was postponed until the procedure could be developed and approved. The procedure has been approved and is now in effect. Additionally, the requirements of the procedure has been disseminated to the appropriate licensed personnel through the required reading program. It is now projected that training on Technical Specification 3.0.D will be implemented during the second quarter of 1991.

Sincerely,

cc: R. A. Burricelli, Public Service Electric & Gas
T. M. Gerusky, Commonwealth of Pennsylvania
J. J. Lyash, USNRC Senior Resident Inspector
T. T. Martin, Administrator, Region I, USNRC
