Director of Nuclear Reactor Regulation
Attention: Mr. John F. Stolz
Operating Reactor Branch No. 4
Division of Operating Reactors
United States Nuclear Regulatory Commission

Dear Mr. Stolz:

In the Toledo Edison letter dated January 31, 1983 (Serial No. 906) a commitment was made to provide input on the remaining open items for "Control of Heavy Loads at Nuclear Power Plants (NUREG-0612)" by April 1, 1983 for the Davis-Besse Nuclear Power Station Unit No. 1. Due to administrative delays (i.e., increasing the budget approval for expanded consultant support) and allowing time for internal review, we find we must extend our scheduled submittal date to May 2, 1983. This has been discussed with our Project Manager the week of March 28, 1983.

Very truly yours,

RPC:LDY:lah
