Attention: Mr. R. H. Engelken, Regional Administrator

Dear Sir:

Subject: Docket No. 50-361
Licensee Event Report No. 82-175
San Onofre Nuclear Generating Station, Unit 2

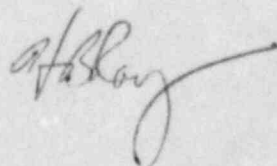

Pursuant to Section 6.9.1.12.i of Appendix A, Technical Specifications to Facility Operating License NPF-10 for San Onofre Unit 2, this submittal provides the required written report and a copy of Licensee Event Report (LER) involving the Reactor Protection System (RPS).

During the investigation of the failures of reactor Trip Circuit Breakers (TCB's) reported in LER 83-019 (Docket No. 50-361) and LER 83-023 (Docket No. 50-362), a review of past Work Orders and Non-Conformance Reports (NCR's) was performed to identify those we believe are reportable.

Enclosed LER 82-175 addresses a reportable failure of TCB's at Unit 2 prior to the March 8, 1983 failures reported in LER 83-019.

If there are any questions, please contact me.

Sincerely,

Enclosure: LER 82-175
