Office of Nuclear Reactor Regulation
Attn: John F. Stolz, Chief
Operating Reactors Branch No. 4
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Sir:

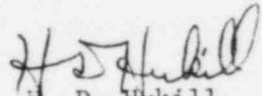

Three Mile Island Nuclear Station, Unit 1 (TMI-1)
Operating License No. DPR-50
Docket No. 50-289
Restart Test Program

Enclosed is a copy of the TMI-1 Restart Test Planning Specification (RTPS) Revision 1. This revision updates the Specification provided to you by our letter dated May 6, 1981 (LIL 134).

This revision of the Specification incorporates changes in the program as a result of the Steam Generator repairs and updates other information related to acceptance criteria or test completion status.

You should note that the set point for the Saturation Monitor alarm (LM-1 on page 24 of 63) is under review. The final setpoint will be defined by our response to NRC letter dated March 4, 1983 concerning Reactor Coolant Pump trip criteria. We will incorporate the appropriate final setpoint into the TMI-1 RTPS in a future revision.

Sincerely,

H. D. Hukill
Director, TMI-1
