Vice President
Nuclear Operations

1CAN048301

Director of Nuclear Reactor Regulation
ATTN: Mr. J. F. Stolz, Chief
Operating Reactors Branch #4
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, DC 20555

SUBJECT: Arkansas Nuclear One - Unit 1
Docket No. 50-313
License No. DPR-51
Technical Specification Change
Request on ANO-1 Reactor Building
Tendon Surveillance Requirements

Gentlemen:

Attached is a revised Technical Specification change request concerning the reactor building tendon surveillance requirements for the tenth year and all subsequent inspections at Arkansas Nuclear One - Unit One (ANO-1). The attached Technical Specification change request revises our submittal dated March 11, 1983, (1CAN038301) by reformatting the Acceptance Criteria into a separate section for ease of referencing and to make minor changes in terminology for purposes of clarification. This Technical Specification change request is being submitted at the request of your Messrs. Guy Vissing and Norman Romney.

It was agreed that these NRC requested changes were editorial in nature for the purpose of increasing clarity. Therefore, the information in our January 26, 1983, (1CAN018302) and March 11, 1983, (1CAN038301) transmittal letters remain applicable to this revision to our Technical Specification change request. No fee is enclosed as this revision amends a Technical Specification change request already under regulatory review.

Very truly yours,

John M. Griffin
