Mr. Dennis M. Crutchfield  
Operating Reactors Branch #5  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Crutchfield:

Subject: Order Confirming Licensee Commitments on  
Post TMI Related Issues  
(Generic Letters 82-05 and 82-10)

The purpose of this correspondence is to clarify the status of three NUREG 0737 items included in your Order Confirming Licensee Commitments on Post-TMI Related Issues dated March 14, 1983. Our status on these three items is as follows:

II.K.3.27 Common Reference Level

As stated in our correspondence of May 7, 1982, our final phase of implementation for this modification will involve the deletion of all references to old scales, procedure revisions and conducting the necessary training. This will be completed during our current refueling outage.

II.D.1.2 Relief Valve and Safety Valve Test Programs.

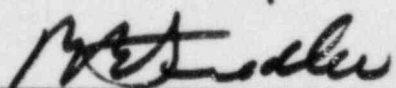

Submittal of our plant specific report will be forwarded to you by April 29, 1983.

III.D.34 Control Room Habitability

As stated in our correspondence of October 8, 1982, only our interim modifications for Control Room Habitability are scheduled for completion during our cycle 11 refueling outage. As discussed in a conference call with Mr. J. Lombardo and J. Reed of your staff on March 22, 1983, the final modifications are scheduled for a later date.

Should you have any questions concerning these items please contact Mr. James Knubel, Manager BWR Licensing at (201) 299-2264.

Very truly yours,

  
Peter B. Fiedler  
Vice President and Director
