Mr. D. G. Eisenhut, Director
Division of Licensing
Office of Nuclear Reactor Regulation
United States Nuclear Regulatory Comm.
Washington, DC 20555

Re: Docket No. STN 50-437
Generic Letter 83-10d

Dear Mr. Eisenhut:

Offshore Power Systems does not believe itself to be a "licensee" as used to address Generic Letter 83-10d, dated February 8, 1983. Rather, we are more properly equivalent to a construction permit holder. We are therefore uncertain as to whether a response to Generic Letter 83-10d is required, but none-the-less offer the following:

The resolution of TMI Action Item II.K.3.5 will be initiated when and if (1) a customer for the first FNP is attained and (2) final design efforts are begun. These events cannot be meaningfully scheduled at this time.

Very truly yours,

R. A. Thomas

R. A. Thomas, Manager
Offshore Power Systems
