This letter submits an update to a previous report submitted on November 17, 1982. The event for which the report was submitted occurred on November 4, 1982, when a Nuclear Regulatory Commission (NRC) audit of Limiting Conditions for Operation (LCO) revealed that an action statement was entered for Technical Specification 3.7.7 on July 30, 1982, and a required Special Report pursuant to Technical Specification 6.9.2 was not filed. The report was submitted pursuant to Technical Specification 6.9.1.12.b since the Special Report required by the LCO was not filed within the time limit of Technical Specification 3.7.7 Action (a).

Work has been completed to correct the deficiencies for which the action statement was entered. The maintenance work order has not been closed and the Limiting Condition for Operation (LCO) is still in effect. A final report will be submitted when the LCO is lifted. Attached is LER 82-106/01 X-1, which is an interim report.

Yours truly,

J. P. McGaughy, Jr.
