Attention: Mr. William T. Russell, Director

Subject: Additional Information relating to the request for EXIGENT TECHNICAL
SPECIFICATION AMENDMENT Supplement to Application for
Amendment to Facility Operating License:

Byron Station Units 1 and 2
(NPF-37/66; NRC Docket Nos. 50-454/455)

"Steam Generator Interim Plugging Criteria"

Reference: D. Saccomando letter to W. Russell transmitting request for
Exigent Technical Specification Amendment for Steam Generator
Interim Plugging Criteria for Byron Unit 1
dated September 17, 1994

Dear Mr. Russell:

The reference letter transmitted Commonwealth Edison Company's (ComEd) proposal to amend Appendix A, Technical Specifications of Facility Operating Licenses NPF-37 and NPF-66, and requested that the Nuclear Regulatory Commission (NRC) grant an EXIGENT amendment to Technical Specification Section 3/4.4.5 "Steam Generators." Due to an error during the distribution of that document, Attachment F page 2 was not included in that transmittal, but is attached for completeness.

Please address any comments or questions regarding this matter to this office.

Sincerely,

Denise M. Saccomando
Nuclear Licensing Administrator
