Mr. John F. Stolz, Chief
Operating Reactors Branch No. 4
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Stolz:

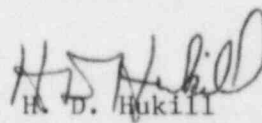

Three Mile Island Nuclear Station, Unit 1 (TMI-1)
Operating License No. DPR-50
Docket No. 50-289
Amendment No. 83

On March 11, 1983 the subject amendment was issued deleting Appendix B Environmental Technical Specifications, which pertained to nonradiological water quality related requirements. In your letter transmitting the amendment, you requested confirmation of our commitment to provide the NRC with a copy of any changes to the NPDES permit and any NPDES permit violations requiring notification to the permitting agency, which is the Pennsylvania Department of Environmental Resources (PaDER).

In regards to changes to the NPDES permit, a copy will be sent to the NRC offices designated in your letter within 30 days after receiving such changes from PaDER. In regards to NPDES noncompliance notifications, a copy will be sent to the designated NRC offices concurrent with submission to the PaDER.

The NRC will be copied on these NPDES matters for a period of two years from the date of this letter and the practice continued beyond that time should the NRC indicate in writing the continued need to receive this information.

Sincerely,

H. D. Hukill
Director, TMI-1
