Re: Nine Mile Point Unit 2  
Docket No. 50-410  
NPF-69

Gentlemen:

Niagara Mohawk Power Corporation hereby transmits an Application for an Amendment to Nine Mile Point Unit 2 Operating License NPF-69. Also enclosed is the proposed change to the Technical Specifications set forth in Appendix A to the above mentioned license. Supporting information and analyses demonstrating that the proposed change involves no significant hazards consideration pursuant to 10CFR50.92 are included as Attachment B.

The proposed change is to Technical Specification Section 6.2, "Organization," to modify Table 6.2.2-1, "Minimum Shift Crew Composition," to reflect that the Shift Technical Advisor (STA) position will normally be a dedicated position, rather than the dual-role (Assistart Station Shift Supervisor/STA) position currently specified.

This proposed change has no safety or environmental significance. The basis for concluding that this request does not involve a significant hazards consideration is included as Attachment B of our application.

Niagara Mohawk would like to incorporate the STA staffing change into NMP2 Operating Shift Crews as soon as possible, and therefore, requests that this amendment be processed by July 15, 1991.

11

Pursuant to 10CFR50.91(b)(1), Niagara Mohawk has provided a copy of this license amendment request and the associated analyses regarding no significant hazards consideration to the appropriate state representative.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

B. R. Sylvia  
Executive Vice President - Nuclear
