Attention: Document Control Desk
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Gentlemen:

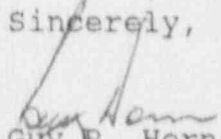

Subject: Revisions to Proposed Technical
Specifications Pages
Cooper Nuclear Station
NRC Docket No. 50-298, DPR-46

- References: 1) Letter, L. G. Kunc1 to USNRC dated August 31, 1989,
"Proposed Change No. 69 to the Cooper Nuclear
Station Technical Specifications, Low-Low Set"
- 2) Letter, G. R. Horn to USNRC dated July 2, 1990,
"Proposed Change No. 81 to Technical
Specifications, Deletion of Cycle - Specific
Parameter Limits"

In the above references, the District submitted two proposed amendments to the Cooper Nuclear Station (CNS) Facility Operating License for NRC review and approval. Subsequent approved Amendments to the CNS Facility Operating License have revised some of the CNS Technical Specification pages that are contained in the above references. This letter provides updated Technical Specification pages for proposed change Nos. 69 and 81 that incorporate all amendments to the CNS Facility Operating License through Amendment 139 issued March 27, 1991.

If there are any questions, please call.

Sincerely,

Guy R. Horn
Nuclear Power Group Manager

AA. Core Operating Limits Report

The Core Operating Limits Report is the unit-specific document that provides core operating limits for the current reload cycle. These cycle-specific core operating limits shall be determined for each reload cycle in accordance with Specification 6.5.1.G. Plant operation within these core operating limits is addressed in individual specifications.
