JOHN S. KEMPER
VICE PRESIDENT
ENGINEERING AND RESEARCH

April 12, 1983

Docket Nos. 50-352
50-353

Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Request for Additional Information Regarding
Operability Qualification of Purge and Vent
Valves

References: 1) Letter, A Schwencer to E. G. Bauer, Jr.,
dated July 30, 1982
2) Letter, J. S. Kemper to A. Schwencer,
dated January 3, 1983

Dear Mr. Schwencer:

In the Reference 2) letter we provided our schedules regarding SQRT and PVORT; and as discussed in our meetings on March 4, 1983, with NRC personnel involved in equipment qualification, our current schedule indicates that NRC SQRT and PVORT reviews can be supported during October 1983. It is expected that at that time 85 to 90% of the equipment to be reviewed will be installed and qualified.

Regarding Purge and Vent Valve Operability Qualification information addressed by Attachments 4 and 5 of Reference 1, the requested information will be submitted to you by July 1, 1983. The Limerick Purge and Vent Valve Operability Program was also described and discussed at the above mentioned March 4, 1983, meeting. The remaining test items for completing the program are outlined on the attachment.

Should any additional information be required, please do not hesitate to contact us.

Very truly yours,
