Subject: Transmittal of Procedures

Gentlemen:

Pursuant to your request are enclosed copies of two Nuclear Energy Services (NES) procedures. These procedures have been reviewed and approved by NES and the New Hampshire Yankee (NHY) Engineering and Quality Assurance Groups. These procedures apply to the two, initial separate tasks involving the Weld Records Reverification. The first task is developing a tabulation of field welds requiring radiography. The scope of this task is defined in the procedure. The second task will inventory the corresponding radiograph packages for those field welds. The third procedure compares the separate outputs from the weld tabulation (task 1) and radiograph package inventory (task 2) to ensure that NHY has the Pullman-Higgins radiographs required by the applicable industry codes. This third procedure is currently in a second round of review by NHY and should be approved by April 30, 1991. NHY will transmit the third procedure to you upon completing final NHY review and approval.

Also enclosed is a copy of the procurement documentation between New Hampshire Yankee (NHY) and Nuclear Energy Services (NES), which establishes the terms and conditions for the weld reverification effort. Proprietary commercial contract information has been intentionally blackened on the purchase order.
