Subject: Submittal of Amendment 1 to the "SBWR Standard Safety  
Analysis Report", 25A5113 Rev. A

This letter transmits Amendment 1 to the "SBWR Standard Safety Analysis Report", 25A5113 Revision A. This amendment updates the SSAR to reflect design changes and responses to SBWR RAIs through the project realignment in the Spring of 1994. This amendment does not include consideration of the ABWR Requests for Additional Information, or the other items which we have agreed will be included in a SSAR Revision to be submitted following resumption of the design related review. These updates will substantively improve the design description presented in the SSAR making it appropriate for reference while the Test and Analysis Program continues.

Sincerely,

*RHB* Buchholz
