Perry Nuclear Power Plant
Docket No. 50-440
Perry Course of Action
Progress Report

Gentlemen:

The Perry Nuclear Power Plant Course of Action (PCA) was submitted to the NRC on November 15, 1993. The PCA is a broad-based performance improvement program for the Perry Nuclear Power Plant which documents plant and management deficiencies identified during internal and external audits and the corrective actions taken or planned to bring about necessary improvements.

Attached is a PCA progress report which details actions that have been completed pursuant to the PCA objectives. The progress report reflects progress through the completion of the fourth refueling outage.

If you have questions or require additional information, please contact Mr. James D. Kloosterman, Manager - Regulatory Affairs at (216) 280-5833.

Very truly yours,

Attachment
