Violation Response Time Extension  
Inspection Report 50-313/94-16; 50-368/94-16

Gentlemen

The subject Inspection Report contains a Notice of Violation for a failure to log certain conditions associated with access authorization documentation deficiencies in the Safeguards Event Log. Arkansas Nuclear One requested in letter OCAN069403 dated June 7, 1994, clarification of NRC requirements for logging and reporting access authorization concerns. A reply dated September 16, 1994, was provided. Since the information contained in the reply appears to provide a basis for logging and reporting that differs from the basis cited in the Inspection Report, further communications to clarify the regulatory basis are believed to be necessary. After a discussion with Mr. Blaine Murray of the NRC Region IV staff on September 23, 1994, we requested and were granted a thirty day extension for the violation response until the issue can be resolved. The response will be provided by October 24, 1994.
