Dear Sir:

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
Monthly Operating Report Corrections

During a review of the information presented on the operating data page, prior to submittal of the February 1983 report, it was realized that yearly and cumulative totals for various categories were incorrect. The erroneous totals were found to have originated with the August 1982 report at which time changes had been made to the computer program utilized in the preparation of the information. The monthly totals have been correct in our submittals since August 1982, therefore, the yearly and cumulative totals presented in NUREG 0200 (gray book) are correct, as we understand they are prepared utilizing the monthly totals.

In order to correct our Monthly Operating Reports from August 1982 through January 1983 inclusive, enclosed are two copies of each affected page with corrections made.

If you should have any questions, please contact Mr. Michael Laggart at (609) 971-4643.

Very truly yours,

Peter B. Fiedler
Vice President and Director
Oyster Creek
