May 1, 1991

U.S. Nuclear Regulatory Commission  
Document Control Desk  
Washington, DC 20555

Gentlemen:

Enclosed are 4 copies of the "Robert E. Ginna Nuclear Power Plant Security Plan "Revision A dated May 1, 1991. The revised Plan is being submitted under the provisions of 10CFR50.54(p) as it does not degrade the security of the plant.

This revision is a rewrite of the Plan using a format compatible with NUREG-0908 "Acceptance Criteria for the Evaluation of Nuclear Power Reactor Security Plans." This effort was in response to U.S. Nuclear Regulatory Commission suggestions, and statements in NRC Inspection Report 50-244/89-08.

Important features of the new Plan are that it does not degrade security, clarifies RG&E planning and eliminates redundancy in the Plan. This submittal includes a Cross Reference Matrix which demonstrates the relationship of the paragraphs in Revision A to those in the previous Plan to facilitate NRC review. To further facilitate NRC review, changes are described in a Synopsis of Changes and highlighted by side-bars.

RG&E is prepared to attend a meeting at NRC Region I offices to discuss this Plan change.

The enclosures to this letter contain Safeguards Information which should be protected from public disclosure per Part 73.21 Code of Federal Regulations.

Very truly yours,

*Robert C. Mecredy*
