Gentlemen:

In the Matter of	)	Docket Nos. 50-327
Tennessee Valley Authority	)	50-328

SEQUOYAH NUCLEAR PLANT (SQN) - TECHNICAL SPECIFICATION (TS)  
CHANGE 92-01, SPENT-FUEL POOL STORAGE CAPACITY INCREASE (TAC  
NOS. M83068 AND M83069)

Reference: TVA letter to NRC dated March 27, 1992, "Sequoyah Nuclear  
Plant (SQN) - Request for License Amendment to Technical  
Specifications (TS) Spent-Fuel Pool Storage Capacity Increase"

In accordance with a telephone conversation on September 15, 1994, TVA notified NRC of a typographical error in Figure 5.6-3 of the subject TS change. The arithmetic sign in front of the third term of the equation defining the Domain II Boundary fuel burn-up should be negative instead of positive. The correct version of this equation is described on page 5-5 in Design Feature Section 5.6.1.1.c.3. The correct equation was used to calculate the curve in Figure 5.6-3. TVA apologizes for any inconvenience this has caused. A corrected copy of Figure 5.6-3 for both Units 1 and 2 is enclosed.

There are no commitments contained in this submittal. Please direct questions concerning this issue to W. C. Ludwig at (615) 843-7460.

Sincerely,

R. H. Shell  
Manager  
SQN Site Licensing
