April 29, 1991

U. S. Nuclear Regulatory Commission  
ATTN: Document Control Desk  
Washington, DC 20555

Subject: Catawba Nuclear Station, Units 1 and 2  
Docket Nos. 50-413 and 50-414  
Annual Radiological Environmental Operating Report

Catawba Nuclear Station Technical Specification 6.9.1.6 requires submittal of the routine Annual Radiological Environmental Operating Report covering the operation of Units 1 and 2 during the previous calendar year prior to May 1 each year. In addition to meeting the Technical Specification requirements, the development of the Annual Radiological Operating Report offers many opportunities to detect and evaluate anomalies in environmental data. The level of evaluation done by Duke Power will require approximately one month of work beyond the May 1, 1991 commitment date. Be advised that a report covering the operation of Units 1 and 2 during the 1990 calendar year will be submitted by June 1, 1991.

Very truly yours,

*M. S. Tuckman*
