William J. Cahill, Jr.  
Executive Vice President

Director of Nuclear Safety and Safeguards  
U. S. Nuclear Regulatory Commission  
Washington, DC 20555

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES)  
DOCKET NOS. 50-445 AND 50-446  
RESPONSES TO NRC REGULATORY EFFECTIVENESS  
REVIEW FINDINGS

REF: NRC letter to William J. Cahill, Jr. from  
Bruce A. Boger, dated March 12, 1991

Gentlemen:

The Regulatory Effectiveness Review (RER), reference NRC TAC numbers 79646 and 79647, was conducted during the period of February 11 through February 15, 1991. TU Electric received the RER report (see reference) on March 20, 1991. Part I of the report categorized four issues generally characterized as tactics, equipment, training, and detection processes as weaknesses to which TU Electric was requested to respond. There were no issues in Part II nor Part III which were identified for action by TU Electric. The attachment to this letter contains TU Electric's responses to the four issues identified in Part I. Also the attachment contains **SAFEGUARDS INFORMATION** as defined by 10CFR73.21 and should not be placed in the Public Document Room.

Please express TU Electric's gratitude for the RER team's professional demeanor and for sharing their experience and knowledge with the CPSES Security personnel. If there are any questions regarding these responses, please contact Mr. Greg Bell at (214) 812-4373.

Sincerely,

*William J. Cahill, Jr.*  
William J. Cahill, Jr.

By: *Roger D. Walker*  
Roger D. Walker  
Manager of Nuclear Licensing
