Roy P. Lessy, Esq.
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Roy:

I am writing to confirm my understanding regarding NECNP's opportunity to review the NRC's recent determination that the Applicants have qualified all electric valve operators inside containment which are important to safety. Yesterday afternoon, in a conference call between the Licensing Board and counsel for NECNP, the Staff, and Applicants, the Board requested that the NRC Staff supply a written affirmation that the Applicants have qualified all electric valve operators inside containment which are important to safety. I asked that NECNP be permitted to review the affidavit and documents showing how the NRC Staff reached that determination. You agreed to make those documents available. Later, in another phone conversation, you restated this offer, and also offered to have NRC technical reviewers discuss their determination with me. You said that you expected to make the documents available on Monday, April 18.

I look forward to visiting your office on Monday to review the documents and discuss them with your technical experts.

Sincerely,

Diane Curran
