Director of Nuclear Reactor Regulation
Attention: Ms. E. Adensam, Chief
Licensing Branch No. 4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Ms. Adensam:

In the Matter of
Tennessee Valley Authority

) Docket No. 50-327
) 328

The Sequoyah Nuclear Plant Unit 1 Operating License Condition 2.C.9, Steam Generator Inspection, has three requirements. The first requirement, 2.C.9.a, was satisfied by the submittal of a report addressing the use of a steam generator camera device for inspections. This report was submitted by letter from me to A. Schwencer on February 27, 1981. The second requirement, 2.C.9.b, was not required to be completed since NRC accepted the use of the camera device for inspection. The third requirement, 2.C.9.c, was not required to be completed by the NRC as a result of TVA's row 1 inspection program that was submitted to the NRC on July 8, 1981 by my letter to you. We therefore consider the Operating License Condition 2.C.9 to be satisfied.

If you have any questions concerning this matter, please get in touch with J. E. Wills at FTS 858-2683.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills
L. M. Mills, Manager
