Mr Harold Denton
Director of Reactor Regulation
U S Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr Denton:

The Concerned Citizens for SNEC Safety is an organization of citizens living near the Saxton Nuclear Experimental Corporation reactor site which is currently mothballed. It is license #DPR-4. GPU Nuclear has informed us that they are considering dismantling the reactor soon. We are very concerned about the safety of dismantling this reactor so soon and think such action could damage our health.

Please see to it that our organization is informed of any requests by SNEC to change or amend their license. We request that we be allowed to intervene at a complete hearing prior to any action on SNEC's requests by the U S N R C. We appreciate your assistance with this problem.

Sincerely,

James H Elder

Chairman
