May 14, 1991

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555

Subject: Beaver Valley Power Station, Unit No. 1 and No. 2
BV-1 Docket No. 50-334, License No. DPR-66
BV-2 Docket No. 50-412, License No. NPF-73
Proposed Operating License Change Request No. 186/50
(TAC Nos. 80269/80270)

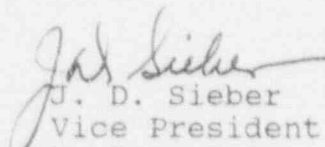

Enclosed are the following:

1. An application for amendment to the above licenses modifying the chemical addition system requirements regarding engineered safety feature subsystems and a revision to the BV-1 chemical injection pump flow requirements in accordance with updated analysis results.
2. Documents designated Attachment A, B and C which set forth, respectively, the change in the Technical Specification, the safety analysis (including the no significant hazards evaluation), and the typed replacement Technical Specification pages.
3. A revision to the Unit No. 1 Bases (included in the above attachments) to add a section describing reactor coolant system pressure isolation valve leakage.

This change has been reviewed by the Onsite Safety Committee and Offsite Review Committee and was determined to be safe based on the attached safety analysis.

It is requested that approval of this change be granted by August 1, 1991.

Sincerely,

J. D. Sieber
Vice President
Nuclear Group
