United States Nuclear Regulatory Commission
Washington, DC 20555

BRUNSWICK STEAM ELECTRIC PLANT, UNIT NOS. 1 AND 2
DOCKET NOS. 50-325 AND 50-324
LICENSE NOS. DPR-71 AND DPR-62
SUPPLEMENTAL REQUEST FOR LICENSE AMENDMENT
MISCELLANEOUS PLANT MODIFICATIONS

Dear Mr. Vassallo:

SUMMARY

In accordance with the Code of Federal Regulations, Title 10, Part 50.90 and 2.101, Carolina Power & Light Company (CP&L) hereby requests revisions to the Technical Specifications (TS) for the Brunswick Steam Electric Plant, Unit Nos. 1 and 2. These revisions supplement our June 16, 1982 submittal concerning miscellaneous TS revisions.

DISCUSSION

On June 16, 1982, CP&L submitted a request for TS revisions to address the deletion of certain safety-related hydraulic snubbers and the installation of specific TMI-related modifications required by NUREG-0737. These plant modifications were scheduled to be completed during the Brunswick-1 refueling outage beginning September 1, 1982. The Brunswick-1 refueling outage commencement was delayed until December 10, 1982 and is presently scheduled to be completed June 24, 1983.

Due to the delay in beginning this Brunswick-1 outage, the lengthy duration of this outage, and changes in the work scope for the outage, certain revisions to the proposed TS changes provided by our June 16, 1982 submittal are needed. These supplemental TS revisions also incorporate changes which resulted from previous revisions being issued as license amendments since the submittal of our June 16, 1982 request.

ADMINISTRATIVE INFORMATION

Enclosed are separate attachments for the proposed TS revisions, each of which includes a description of the item changed, a summary of the basis for the change, and retyped TS pages reflecting the proposed revisions. The enclosed TS pages supersede the same numbered pages provided in our June 16, 1982 request. The revisions on the enclosed TS pages are indicated by vertical lines in the right-hand margin. Since this request is a supplement to our June 16, 1982 request, we have determined that no additional license amendment fee is required.

The Brunswick-1 refueling outage is presently scheduled to be completed on June 24, 1983. Since the TS revisions provided herein are needed to support start-up of the unit following completion of the outage, we request your expeditious review of this submittal.

Should you have any questions concerning this submittal, please contact our staff.

Very truly yours,

P. W. Howe
Vice President
Brunswick Nuclear Project
