Gentlemen:

TECHNICAL EVALUATION REPORTS
ENVIRONMENTAL QUALIFICATION OF SAFETY-RELATED ELECTRICAL EQUIPMENT
NORTH ANNA POWER STATION UNITS 1 AND 2

This letter is in response to the request of your March 24, 1983 letter to review proprietary material contained in The Franklin Research Center Technical Evaluation Reports (TERs) for North Anna Power Station Units 1 and 2 and inform you if proprietary protection is still required. Vepco has completed its review of the proprietary information and found one (1) item that is proprietary. This is item 61 (pages 5a through 5j). Application for withholding and affidavits for this information were submitted to the NRC when the proprietary documents were originally submitted.

This completes the 30 day response requirements of the March 24, 1983 letter with regard to proprietary information.

Very truly yours,

W. L. Stewart

cc: Mr. James P. O'Reilly
