Docket No. 50-346

License No. NPF-3

Serial No. 941

May 2, 1983

Director of Nuclear Reactor Regulation
Attention: Mr. John F. Stolz
Operating Reactor Branch No. 4
Division of Operating Reactors
United States Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Stolz:

Under separate cover, we are transmitting three (3) original and forty (40) conformed copies of an application for Amendment to Facility Operating License No. NPF-3 for the Davis-Besse Nuclear Power Station Unit No. 1.

This application requests that the Davis-Besse Nuclear Power Station Unit 1 Technical Specifications, Appendix A, be revised to reflect the changes attached. The proposed changes involve Tables 4.3-6 and 4.3-10.

This amendment request is for a one time extension of surveillance for steam generator outlet pressure instrumentation. The surveillance test will be performed before the refueling outage if the plant is shutdown greater than two weeks and the containment is open for general access.

This amendment request involves a change of Class III type. Enclosed is a check for \$4,000 as requested by 10CFR170.22.

Very truly yours,

A001
