Gentlemen:

In the Matter of
Tennessee Valley Authority

)
)

Docket No. 50-328

SEQUOYAH NUCLEAR PLANT (SQN) - TECHNICAL SPECIFICATION (TS) CHANGE 94-02,
"ONE-TIME EXTENSION OF SURVEILLANCE REQUIREMENT (SR) INTERVALS - UNIT 2"

In accordance with 10 CFR 50.90, we are enclosing a requested amendment to License DPR-79 to change the operating license of SQN Unit 2. The proposed change will revise a temporary license condition that extends certain TS SR intervals to coincide with the Unit 2 Cycle 6 refueling outage. This request increases the extension approved by NRC in a letter to TVA dated November 9, 1993, "Issuance of Amendment (TAC No. M87697) (TS 93-12)."

The proposed operating license change is identified in Enclosure 1. The justification for the proposed change is provided in Enclosure 2. A proposed determination of no significant hazards consideration performed pursuant to 10 CFR 50.92 is provided in Enclosure 3. A listing of SRs to be extended is provided in Enclosure 4.

TVA requests NRC approval of this operating license change request by April 1994 to support the extension of SRs that will exceed their allowable extension in accordance with TS 4.0.2 and NRC approved Amendment 162 for Unit 2 on April 15, 1994.

TVA requests a 30-day implementation period for this TS change following issuance.
