Docket No: 50-352
50-353

SUBJECT: Limerick Generating Station, Units 1 and 2
E - System Pipe Clamps on Elbows

FILE: GOVT 1-1 (NRC)

Dear Mr. Purple:

The Mechanical Engineering Branch (MEB) is conducting a generic evaluation of E-System pipe clamps to ensure that for clamps located at or near welds on elbows the stresses calculated for the piping are within code allowables. The enclosure to this letter provides MEB with information on the manner in which the effects of E-system clamps are considered in the design of Limerick. Should further information be necessary, do not hesitate to contact us.

Very truly yours,

John S. Kemper
