Director of Nuclear Reactor Regulation
United States Nuclear Regulatory Commission
Attn: Mr. Steven A. Varga, Chief
Operating Reactors Branch No. 1
Division of Licensing
Washington, DC 20555

Reference: Beaver Valley Power Station, Unit No. 1
Docket No. 50-334, License No. DPR-66
Environmental Qualification of Electrical Equipment

Gentlemen:

This letter is in response to the Clarification of Environmental Qualification Safety Evaluation Report dated March 29, 1983. The items of concern were (1) the justification for continued operation submittals and (2) our review of the Technical Evaluation Report for proprietary information withholding.

We have performed a review of our previous submittals for IE Bulletin 79-01B and the SER and determined that a justification for continued operation has been provided in our previous submittals for all equipment where required (note that no Category IV items were identified in the SER for Beaver Valley Unit 1).

A review of information contained in the TER previously identified by us as being proprietary has been performed by Westinghouse, owners of this information. Westinghouse has informed us that this information is still considered proprietary.

Westinghouse Affidavit, CAW-80-31, concerning the withholding of proprietary information from public disclosure was provided with our September 30, 1980 submittal for IE Bulletin 79-01B. This affidavit set forth the basis on which the information may be withheld from public disclosure by the Commission and addresses with specificity the considerations listed in paragraph (b)(4) of Section 2.790 of the Commission's regulations.

Accordingly, it is respectfully requested that the information which is proprietary to Westinghouse be withheld from public disclosure in accordance with 10 CFR 2.790 of the Commission's regulations. Correspondence with respect to the proprietary aspects of this application for withholding or the supporting Westinghouse affidavit should reference CAW-80-31, and should be addressed to R. A. Wiesemann, Manager, Regulatory and Legislative Affairs, Westinghouse Electric Corporation, P. O. Box 355, Pittsburgh, Pennsylvania 15230.

CONFIDENTIAL
