EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

0 2 On April 9, 1983, during routine shutdown operation, an operator observed increasing

0 3 lube oil temperatures on No. 22 Charging Pump. Due to maintenance at the time of the

0 4 occurrence, the redundant charging pumps were not operable. The pump was declared

0 5 inoperable and Action Statement 3.1.2.3 was entered. Investigation of the problem

0 6 revealed that service water flow to the pump coolers was restricted by shells of

0 7 oysters and other miscellaneous mollusks. The occurrence constituted operation in a

0 8 degraded mode in accordance with Technical Specification 6.9.1.9b.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

1 0 Further investigation revealed that the release of the shells was apparently related

1 1 to the shutdown maintenance activities including draining and cleaning of major

1 2 portions of the service water system. The shells were removed, the pump was satis-

1 3 factorily tested and the action statement was terminated.
