**Transfer of Very Low-Level Waste to Exempt Persons for Disposal: Proposed Interpretive Rule; Request for Comments; Chapter I of Title 10 of the Code of Federal Regulations (10 CFR) (NRC-2020-0065)**

On March 6, 2020, the U.S. Nuclear Regulatory Commission (NRC) published a document in the *Federal Register* (85 FR 13076), issuing a proposed interpretation of its low-level radioactive waste disposal regulations. The NRC's intent is that this interpretive rule will allow licensees to transfer very low-level radioactive waste to exempt persons for the purpose of disposal by land burial. Comments on the proposed interpretive rule are due by April 20, 2020.

**List of Approved Spent Fuel Storage Casks: NAC International MAGNASTOR® System, Certificate of Compliance No. 1031, Amendment No. 8; Direct Final Rule; Confirmation of Effective Date; 10 CFR Part 72 [Regulatory Information Number 3150-AK38; NRC-2019-0195]**

On March 5, 2020, the NRC published a document in the *Federal Register* (85 FR 12861) confirming the effective date of March 24, 2020, for the direct final rule that was published in the *Federal Register* on January 9, 2020 (85 FR 1096). This direct final rule amended the NRC's spent fuel storage regulations by revising the "List of approved spent fuel storage casks" to include Amendment No. 8 to Certificate of Compliance No. 1031 for the NAC International, Inc. MAGNASTOR® System. The effective date of March 24, 2020, for the direct final rule published January 9, 2020, is confirmed.

**Power Reactors in Extended Shutdowns; Petition for Rulemaking; Denial; 10 CFR Part 50 [Docket No. PRM-50-114; NRC-2016-0204]**

On March 3, 2020, the NRC published a document in the *Federal Register* (85 FR 12442) denying a petition for rulemaking dated September 1, 2016, submitted by Mr. David Lochbaum on behalf of the Union of Concerned Scientists and two co-petitioners (the petitioners). The petition was docketed by the NRC on September 14, 2016, and was assigned Docket No. PRM-50-114. The petitioners requested that the NRC amend its regulations to "promulgate regulations applicable to nuclear power reactors with operating licenses issued by the NRC but in an extended outage." The NRC is denying the petition because the NRC already has regulatory processes in place to address the issues identified in the petition. The docket for the petition for rulemaking, PRM-50-114, was closed on March 3, 2020.
