Reference: A) D. P. Hall to J. G. Keppler letter U-10062,  
Corrective Action Program dated May 31, 1983.

Subject: Corrective Action Program

Dear Mr. Keppler:

The purpose of this letter is to advise you of actions taken in addition to those noted in Reference A to complete the resolution of NRC concerns regarding the Corrective Action Program.

All applicable IP and BA departmental procedures have been revised and issued to reflect the additional requirements of Corporate Nuclear Procedure 3.02, Corrective Action. Departmental training to these procedures has been completed.

A lesson plan, Corrective Action Report Writing, was developed and presented to all site personnel involved in the initiation and/or resolution of CA documents. This lesson plan emphasized the correct method of describing and documenting an adverse condition and the analytical method of determining root cause and generic corrective action to prevent repetition.

IP has addressed and completed action on all NRC concerns regarding the Corrective Action Program.

Sincerely yours,

D. P. Hall  
Vice President
