DOCKET NUMBER 50-289
PROD. & UTIL. FAC.

Dear Sir:

This letter refers to Docket 50-289SP - TM that I located Middleton, Pa. I feel you are unjustly penalizing the industry in keeping this unit closed down. As usual, the consumer picks up the tab for your actions, in additional costs that the industry takes out of us from additional costs of oil and coal.

When are you people going to wake up? The rest of the world is pursuing nuclear development at a rapid rate - while we sit with regulations, prejudice, discrimination, etc. on nuclear energy development.

We need this source of energy until solar and other sources of energy can be developed.

Thank you.

E.W. Lortzger
