

DOCKET NUMBER 50-289  
PROD. & UTIL. FAC. . .

Jan 29, 1981

Dear Sirs;

In my opinion Nuclear power is safe,  
inexpensive and very much needed.

I understand you are currently debating  
the restarting of Three Mile Island #1. It was  
not damaged and needs to be restarted now.

I also understand that many modifications  
have been made to it to make it safer. In  
my opinion you have waited too long already  
to make your decision to start it. Please do so  
now, it cost us lots of money each day sitting  
there. We are ~~already~~ dependent upon  
foreign oil - Nuclear energy can help us to become  
more independent.

Sincerely
