OFFICE OF THE SECRETARY
June 8, 1981 D.C.

Mr. A. Schwencer, Chief
Licensing Branch 2
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: LaSalle County Station Units 1 and
Response to Informal Question -
Fuel Lift Analysis
NRC Docket Nos. 50-373/374

Dear Mr. Schwencer:

Enclosed is a summary report documenting the methodology employed in the analysis of fuel lift on the LaSalle County Station units. This methodology has been reviewed and determined to be in compliance with the intent of the requirements of draft Standard Review Plan 4.2, Appendix A. The results of this analysis for LaSalle County Unit 1 are also reported as requested informally by the NRC Staff.

You will also note that the fuel lift model employed in the analysis, contains information which General Electric customarily maintains in confidence and withholds from public disclosure. The information has been handled and classified as proprietary to General Electric, and we hereby request that the designated materials be withheld from public disclosure in accordance with the provisions of 10 CFR 2.790. General Electric Company submitted an affidavit on the proprietary nature of these materials (executed by Mr. G. G. Sherwood on June 4, 1981) to Mr. A. Bournia of your staff on June 5, 1981. That affidavit is incorporated herein by reference.

Please address any questions you may have concerning this matter to this office.

Very truly yours,

L. O. DelGeorge
Nuclear Licensing Administrator
