Re: Tennessee Valley Authority
Sequoyah Nuclear Plant

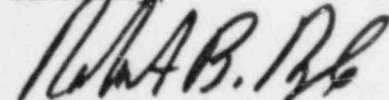

Dear Sirs:

On or about December 27, 1982, the U. S. Tennessee Valley Authority submitted to the U. S. Nuclear Regulatory Commission a REQUEST FOR A LICENSE AMENDMENT seeking approval for a Volume Reduction and Solidification System for use at its Sequoyah Nuclear Plant. It is my understanding that NRC internal procedures require a notice to be published in the Federal Register and a public opportunity to request a hearing or otherwise comment or participate in the licensing proceeding. To date I have not seen any notice relating to this matter in the Federal Register.

Could you advise me as to the anticipated date of the Federal Register notice. I would also like to know if the NRC will accept petitions requesting a hearing prior to publication within the Federal Register.

Thank you very much.

Sincerely,

ROBERT B. PYLE
