Crystal River Unit 3
Docket No. 50-302

July 18, 1991
3F0791-06

U.S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, D.C. 20555

Subject: Technical Specification Change Request No. 184 Withdrawal

Reference: A. FPC to NRC letter dated February 22, 1991

Dear Sir:

Florida Power Corporation (FPC) submitted Technical Specification Change Request No. 184 (TSCRN 184) in Reference A. This request was made to allow a one-time extension to the 24-month surveillance interval required by the Technical Specifications for performing eddy current testing.

Crystal River Unit 3's (CR-3) Refuel 8 schedule has been changed from Fall 1992 to April 1992. CR-3 will be shut down before the end of the 24-month surveillance interval, although the surveillance itself may not occur within that time. This has been discussed with the NRC staff and the Staff agrees that a surveillance interval extension for performing eddy current testing is no longer needed. Therefore, FPC has decided to withdraw TSCRN 184.

Sincerely,

G. L. Boldt
Vice President
Nuclear Production
